### Message from the Guest Editors

Dear Colleagues,

This Special Issue of the journal *Microorganisms* aims to describe the diversity of mechanisms by which the bacterium *Pseudomonas aeruginosa* promotes its survival and persistence in various environments. To this end, we will examine the importance and complexity of the regulatory networks by which this bacterial species adjusts its physiological processes to adapt and survive in response to environmental cues and stresses.

Dr. Thierry Jouenne  
Dr. Julie Hardouin  
*Guest Editors*

Deadline for manuscript  
submissions:

**31 May 2022**

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC and many other databases.

**Journal Rank:** JCR - Q2 (*Microbiology*)
